The Garden Design Process ...what's involved?

A strong well thought out garden design will improve your property value; energise your lifestyle & well-being. We start with an initial light hearted yet serious site visit (OSC) your home to see your home, its setting, house style and a chance to walk the site and look at various conceptual garden design options available for a zone or the whole site.

Initial 1/2 day On-Site garden design Consultation (OSC)

Step 1: The Site Survey and Client design brief

If the client is happy with the initial OSC they may instruct the designer to proceed with the site survey & client garden design brief;

Step 2: The Conceptual Garden Design Package option

This is a very cost effective way of getting a zonal or holistic conceptual master plan, hard & soft mood boards, & outline material & build costs without committing to the full design package;

Step 3: An optional 3-D Conceptual sketch

A scaled 3-D view of the garden zone or holistic;

Step 4: Planting Plans and planting schedule

Clients can have a specific plant border designed or whole garden planting design;

Step 5: Optional Construction details and setting out details drawings

Detailed drawings of structures, walls, boundaries steps water features etc;

Step 6: Optional garden construction build specification and tender documents

Some clients are happy to go with their own landscaper but its possible to get 2 or 3 contractors to quote for their new garden build & a set of client specific contract documents can be prepared and the tenders analysed for clients;

Step 7: Garden build project supervision and Post build garden maintenance

The garden designer is happy to supervise the garden project for clients on a visit by visit fee basis and a Post build garden maintenance schedule can also be prepared.

Michael O'Reilly MGLDA

Michael O'Reilly MGLDA established **The Garden Design Shop** 2009 & now designs private & commercial designing gardens across Ireland, the UK & internationally in the Ukraine & Kazan Russia.

Originally from a Civil Engineering background, Michael enjoys working with a wide range of clients & relishes designing engineering solutions for horticultural design challenges problems with imaginative innovative solutions & has designed many new innovative garden products.

Michael is often invited as **international speaker** delivering design seminars on **The Business of Garden Design** in countries eg Ireland, England, Ukraine, Belarus & Kazan in Russia & has recently been invited an International show garden panel judge in Ukraine & Belarus.

Michael previously worked as Projects Manager/civil engineer ran his own building and garden landscape business for 15 years building: one-off houses, domestic extensions, bespoke garden rooms & created many beautiful commercial, private family & numerous 'Gold' medal winning show gardens in Ireland & most recently at RHS Gold at Tatton Park flower show

Michael believes innovative **concept design tailored for each client is key** & he approaches each bespoke client brief with enthusiasm and energy. Michael offers a good well-rounded design experience, & loves a real design challenge ultimately **helping clients to improve their property value, life style & personal well-being.**

Amazing Spaces

It's amazing what you can do with a small 5m x 5m corner of your garden! This beautiful multi-award winning show garden called "A Room for all Seasons" co-designed by local Belfast based garden designer Michael O'Reilly MGLDA of The Garden Design Shop, was created to show the public how a strong well thought out colourful and energetic design can transform your green zone and create a beautiful "must-go-to" contemporary refuge for "work, rest and play"....and can be used all year round.
